"Development of a transmitter with a metal coramic triode, which will operate by means of higher harmonics (Observelles) in the range of Tell'"

- 2. Notes on program for 1947:
 - a. The Mallachlitz program is being completed and the further development of the Mullschlitz tube to the and of December 1947 has been decided on.
 - b. The Elystran program is being completed.
 - c. The Y-type program is being completed but there is some difficulty in the preparation of cathodes. There is also difficulty with the RV 12 Pb (P 2000). The insulation posts have not been satisfactory. The reason for this fault has not yet been discovered.
- 5. Preparation for tube production in the USSR:
 - A certain Natschorin from Moscow visited the Obersprosmerke to discuss the export of plant facilities and components for tube production.
 - b. The preparation of caranic kilms (Brannöfen zum Einbrannen) for delivery to the USSR and to the "Bescho" Keramikwerks at Hermsdorf/Th. has begun. The Hermsdorf firm will begin the production of metal ceramic tubes in 1948. Ceramic parts, equipment for the testing of oscillating ceramic tubes, and "Prufsender" are being sent to a metal ceramic factory in Novositirsk.
 - G. The parts are so far prepared that they need only be welded together in the USSR. Operating instructions and mixture formulas for the ceresic parts are also being sent.
